**Specification**

The following is a marked-up version of the specification with the language that is underlined (“    ”) being added and the language that contains strikethrough (“”) being deleted:

Page 5, lines 18 through 28.

The ink chamber 36 46 is capable of holding a volume of fluid (for example, ink) (not shown) such as, but not limited to, pigment-based inkjet inks and/or dye-based inkjet inks. These can include black ink and inks having a plurality of colors such as, but not limited to, cyan, yellow, and magenta. The barrier layer 48 functions to separate the ink flow so that ink can be individually provided to each nozzle system 40. In one embodiment, barrier layer 48 can be made of materials such as, but not limited to, Kapton.TM., Upilex.TM., (3M Corp), or like material. The transparent substrate 50 is transparent to the laser energy 58 emitted by the laser system 20. In one embodiment, the transparent substrate 50 can be made of material such as, but not limited to, glass, quartz or like material.
